SUMMARY

U.S. unmanufactured tobacco exports during April 1986 totaled 21,195 tons, valued at $126.4 million. Compared with April 1985, this is a decline in quantity of 14 percent and value by 23 percent. April flue-cured tobacco exports totaled only 4,844 tons, valued at $31.4 million. From the previous year, shipments were down 42 percent in quantity and 41 percent in value. Burley exports during April totaled 12,051 tons, valued at $78.5 million. Compared with April 1985 burley shipments, quantity was down only 1.5 percent while value was down 12 percent. Cigarette shipments during April 1986 totaled 4.33 billion pieces, valued at $89 million. Compared with April 1985, quantity and value rose 45 and 48 percent, respectively.

Meanwhile, unmanufactured tobacco imports for consumption during April 1986 totaled 21,631 tons, an increase of 45 percent from 1985. The duty-paid value was $68 million, an increase of 54 percent. General imports (actual arrivals) of unmanufactured tobacco during April 1986 totaled 79,389 tons, up 23 percent from 1985. The April 1986 value was $243.2 million, an increase of 39 percent over 1985.

Hong Kong's two major cigarette companies announced retail price increases on a number of major cigarette brands. The price increases range from five to seven percent and are considered the result of rising manufacturing costs.

Ireland's Minister of Health announced further regulations governing tobacco advertising. The new regulations include: more harshly worded warning labels on cigarette packs, the new requirement of warning labels on all other tobacco products, and restrictions on the sponsorship of sporting events.

The Saudi Arabian Ministry of Finance is considering an increase in the tariff on cigarettes to 50% ad valorem.

Spain announced several price changes in imported tobacco products, including cigarettes, cigars, and pipe tobacco. The price changes have been prompted by the need to align the Spanish tax structure with that of the rest of the European Community.

In Taiwan, a leading U.S. cigarette producer reportedly has entered a joint venture agreement with the Taiwan Tobacco and Wine Monopoly Bureau.

Canada has made several changes in the production control and price support system for flue-cured tobacco. As of May 23, 1986, the Ontario Flue-Cured Tobacco Growers' Marketing Board market had been open 77 days, with a total of 170 million pounds sold. The average price was Can$1.26 (US$0.91), up slightly from last month's report of Can$1.25.

Turkey has passed legislation that abolished the tobacco monopoly there. The Council of Ministers will determine the regulations for privatization of the monopoly and the establishment of auction centers.

In Zimbabwe, the Tobacco Marketing Board has reported 6 weeks of flue-cured tobacco sales as of May 28. For the 6 weeks, sales totaled 22,893 metric tons, valued at Z$69 million, at an average price of Z$3.02 per kilogram, or approximately US$0.89 per pound.

World Developments Affecting Tobacco Demand

On May 13, 1986, Hong Kong's two major cigarette companies announced retail price increases on a number of major cigarette brands. The price increases range from five to seven percent and are considered the result of rising manufacturing costs, which includes higher duties on unmanufactured tobacco and rising inflation. In 1985, U.S. exports of unmanufactured tobacco and cigarettes to Hong Kong were valued at $30.5 million and $167 million, respectively. The U.S. accounts for 25 percent of Hong Kong's unmanfactured tobacco imports and 70 percent of total cigarette imports. The price increase is not expected to cause a shift from locally manufactured cigarette brands to imported brands but is expected to have some effect on total consumption.

On May 13, 1986, Ireland's Minister of Health announced further regulations governing tobacco advertising. The new regulations include: more harshly worded warning labels on cigarette packs, the new requirement of warning labels on all other tobacco products, and restrictions on the sponsorship of sporting events. The tougher cigarette warning labels are to be in use by December 1, 1986. According to industry representatives, the new regulations are the most restrictive of any country and will cause tobacco product sales to continue to fall. U.S. shipments of unmanufactured tobacco to Ireland averaged around $20 million in 1984 and 1985, considerably higher than shipments in past years. With the new restrictions, U.S. exports to Ireland could be reduced. These restrictions are in line with the Irish Government's December 20, 1985, announcement of import restrictions on smokeless tobacco products. Under this restriction, the importation, manufacture, sale, disposition or advertisement of smokeless tobacco products is prohibited, unless a permit has been authorized by the Minister of Health. The smokeless tobacco placed under this restriction is described as "finely cut, moist tobacco contained in sachets or pouches and intended for use by being placed in the mouth." While the order allows for permits, the Department of Health has indicated that there would be no flexibility on this issue.

The Saudi Arabian Ministry of Finance, in tandem with the Gulf Cooperation Council (GCC), is considering an increase in the tariff on cigarettes to 50 percent ad valorem. (Members of the GCC include Saudi Arabia, Bahrain, Kuwait, the United Arab Emirates, and Oman.) This compares unfavorably to the current specific rate of approximately $1.37 per 1,000 pieces. The reasons cited for the proposed increase are to lower the increasing smoking rates among the youth. There are indications that the increase is intended to raise government revenues. U.S. cigarette exports to Saudi Arabia last year totaled $149 million, and over $250 million to the entire GCC. Such a proposed increase, scheduled for implementation in 1987, would most likely seriously hurt exports to that region.

Last month's issue reported on changes in Spain's domestic price of manufactured tobacco products. The increases were on domestic products and averaged about 10 percent, about 1.9 percent above the inflation rate in 1985. Increases for domestically produced dark cigarettes rose 13-15 percent, while American-type or blond cigarettes went up only 8.8 percent on average. Now, there are reported changes in imported products as well. Prices for blond cigarettes imported from the European Community (EC) were reduced from 6 to 34 percent, with most reductions over 25 percent. Prices for dark cigarettes imported from France were increased by about 7 percent. Likewise, pipe tobacco imported from the EC had price changes, mostly price decreases. Domestic pipe tobacco prices went up an average of 9.5 percent. Cigar prices were also increased, regardless of source. Domestic cigar price increases ranged from 7 to 18 percent. Cuban and Philippine prices were raised about 8 percent. The price changes have been prompted by the need to align the Spanish tax structure with that of the rest of the EC. For cigarettes, the same brands imported from the U.S. will not benefit from the reduction. U.S. manufactured tobacco exports to Spain, valued at over $55 million in 1985, could drop as a result of these pricing changes.

In Taiwan, a leading U.S. cigarette producer has reportedly entered a joint venture agreement with the Taiwan Tobacco and Wine Monopoly Bureau (TTWMB). Under this agreement, the U.S. company will supply technical advice and 40 percent of the tobacco leaves with the TTWMB supplying funding and 60 percent of the leaves to produce cigarettes under a U.S. brand name. Imports account for nearly half the tobacco consumed in Taiwan. With the U.S. already supplying over 75 percent of the Taiwan market, this move will help insure the continuation of a demand for U.S. leaf.

World Developments Affecting Tobacco Supply

In Canada, the Ontario Flue-Cured Tobacco Growers' Marketing Board market had been open 77 days, as of May 23, 1985, with a total of 170 million pounds sold. The average price was Can$1.26 (US$0.91), up slightly from last month's report of Can$1.25. However, prices for this year's market are much lower than the Can$1.46 (US$1.05) average on day 77 of last year's market. Given the lowering in the U.S. price and the general supply situation in Canada, this is to be expected. Due to the delay in this year's market opening, daily sales have been increased when compared to last year.

On June 3, 1986, the Ontario Flue-Cured Tobacco Growers (OFCTGMB) announced an increase in the targeted production level of the 1986 Ontario flue-cured crop by 6,800 tons up to 58,967 tons. Prior to this announcement, on May 20, 1986, the OFCTGMB in agreement with the Canadian Tobacco Manufacturers had set the Ontario production target at approximately 52,000 tons. The previous target for the province was some 30 percent below the estimated 1985 production level of 77,000 tons. The increase in the production target is believed to be in response to two factors. First, on June 3, the Federal and Ontario governments granted the OFCTGMB a loan guarantee of between Can$2-$6 million to cover the projected shortfall on the sale of the 1985 Ontario crop surplus. (The OFCTGMB was granted market authority to promote tobacco exports beginning with the 1985 crop.) Prior to the announced loan guarantee, there was no evidence of an immediate export sale of the 1985 crop surplus. As a result of the loan guarantee, the 1985 crop surplus will be sold in mid-June 1986 but at a price below the guaranteed market price (GMP).

A second factor in raising the production target was an indication from Canadian tobacco exporters and overseas buyers, particularly from the United Kingdom, that the previous production target might not be sufficient to meet anticipated export demand. Prices are scheduled to increase 4.4 percent or Can$0.17 to Can$4.06 per kilogram for the guaranteed minimum price (GMP) for domestically consumed tobacco, just slightly above the inflation rate of around 4 percent. The CTMC will not provide an export incentive fund for 1986. For exported tobacco, a minimum grade price of Can$2.64 per kilogram, unchanged from last year, was established, and exports are expected to trade at or near that price. (Production figures in this article are based on preliminary estimates.)

On May 27, Turkey's Grand National Assembly discussed a bill that would privatize state economic enterprises. In a surprise move, abolishment of the tobacco monopoly was added to the bill, which passed by a 2 to 1 margin. The Council of Ministers will determine the regulations for privatization of the monopoly and the establishment of auction centers. Import of tobacco for cigarette manufacture will be allowed, but the import of cigarettes will not. In addition, the bill authorizes the production of burley tobacco. The bill also calls for the establishment of an import surcharge above present tariffs on tobacco for cigarette manufacture with the money allocated for tobacco farmers' support and the domestic housing program. This bill will improve the opportunity for U.S. exports of leaf tobacco to Turkey, as the private market will better cater to the consumers' taste for American-style cigarettes.

In Zimbabwe, the Tobacco Marketing Board has reported 6 weeks of flue-cured tobacco sales as of May 28. For the 6 weeks, sales totaled 22,893 metric tons, valued at Z$69 million, at an average price of Z$3.02 per kilogram, or approximately US$0.89 per pound. The average price for Week 6 was Z$3.16 per kilogram, a new record. The increase was mainly due to higher quality grades being offered. A lower rejection rate also accounts for the increased price. Volume and prices are sharply higher than the first 6 weeks of 1985, with sales of Z$37 million, and a volume of 15,151 tons. The average price was Z$2.46 per kilogram, or approximately US$0.65 per pound. The Zimbabwe dollar has also appreciated 11 percent against the U.S. dollar since last year, accounting for some of the price increase when expressed in U.S. dollars.

The Tobacco Marketing Board also reported export permits issued for January to April, 1986, compared with 1985:

Country or Region	1985	1986

U.S. Tobacco Developments

Unmanufactured tobacco exports during April 1986 totaled 21,195 tons, valued at $126.4 million. Compared with April 1985, this is a decline in quantity of 14 percent and value by 23 percent. Flue-cured and burley shipments accounted for 80 percent of the total unmanufactured export volume. Leading markets during April were: Japan with 7,606 tons, followed by the Federal Republic of Germany (3,014 tons), Italy (2,367 tons), the United Kingdom (1,091 tons), and The Netherlands (906 tons).

April flue-cured tobacco exports totaled only 4,844 tons, valued at $31.4 million. From the previous year, shipments were down 42 percent in quantity and 41 percent in value. Stemmed flue-cured leaf continues to account for approximately 80 percent of the total export quantity. Leading markets were: the Federal Republic of Germany with 1,607 tons, followed by the United Kingdom (619 tons), Denmark (522 tons), and Austria (464 tons).

Burley exports during April totaled 12,051 tons, valued at $78.5 million. Compared with April 1985 burley shipments, quantity was down only 1.5 percent while value was down 12 percent. [This occurrance whereby value is reduced while quantity is constant is the result of reductions in grower loan rates and not a decline in quality.] Japan led all markets with shipments of 6,773 tons, followed by Italy (2,367 tons), the Federal Republic of Germany (1,071 tons) and Poland (383 tons).

Cigarette shipments during April 1986 totaled 4.33 billion pieces, valued at $89 million. Compared with April 1985, quantity and value rose 45 and 48 percent, respectively. Shipments to the EC-12 rose by 207 percent in quantity and 231 percent in value over April 1985. All of this increase was due to shipments to Belgium-Luxembourg which rose from 464 million pieces in April 1985 to 1,377 million in April 1986. In other major cigarette markets, shipments overall were up by 13 percent in quantity and 10 percent in value. Countries with increased shipments include Hong Kong, Japan, and Panama. Significant declines in this category during the month were noticed in Saudi Arabia and Panama.

Unmanufactured tobacco imports for consumption during April 1986 totaled 21,631 tons, an increase of 45 percent from 1985. The duty-paid value was $68 million, an increase of 54 percent. Leading sources were Turkey, with 17,631 tons, Brazil (13,628 tons), Canada (5,667 tons), Greece (4,633 tons), and Republic of Korea (3,298 tons).

U.S. general imports (actual arrivals) of unmanufactured tobacco during April 1986 totaled 79,389 tons, up 23 percent from 1985. The April 1986 value was $243.2 million, an increase of 39 percent over 1985. Leading suppliers include: Turkey (33,378 tons), Brazil (10,273 tons), Canada (6,627 tons), and Greece (5,939 tons).

Special Report: World Tobacco Production

World 1986 total unmanufactured tobacco production is forecast at 6.6 million tons down 4 percent from last year and 5 percent below the 1982 production record of 6.9 million tons. The total unmanufactured tobacco crop in China, the world's largest producer, is forecast at 2.1 million tons, 7 percent below last year's record crop of 2.3 million tons. Despite efforts in recent years to curb output and improve tobacco quality, excess production and quality problems continue to plague the Chinese tobacco industry. To correct both of these problems, the Chinese government has introduced a new, more specific grading system which is a simplified version of the U.S. system. In the United States total unmanufactured tobacco production is projected down 12 percent. A 6 percent decline in area, sluggish domestic demand and excess stocks are factors contributing to the lower projected output.

Other major tobacco-producing countries with smaller crop prospects include Canada, Brazil, Italy, Poland, the Philippines, Thailand, and Pakistan. With the exception of Poland and the Philippines, production in these countries is projected to be less, due to weather-related problems and/or high stock levels. Lower yields are expected in Poland and a shift from tobacco to more profitable crops is occurring in the Philippines.

The 1986 world flue-cured tobacco crop is forecast at 3.5 million tons, 7 percent less than last year's crop. Production is forecast down 8 percent in China, the world's largest producer, mainly due to a 7 percent area decrease.

The world's third largest producer, Brazil, also faces declining production due to drought. This year's Brazilian crop also faces quality problems which could have an adverse impact on their exports. Canada's production is forecast down 28 percent due to a reduced area planted caused by weak domestic and export demand and high stock levels. Other major flue-cured producers where smaller crops are projected include the United States, the second largest flue-cured producer, India, the Philippines, Italy, and Pakistan.

World burley tobacco production in 1986 is projected to fall 4 percent from last year and total 669,000 tons. Production in the United States, the world's largest producer, is anticipated to be 8 percent less mainly due to a 5 percent decline in area. Smaller crops are also forecast in Italy, the Philippines and Thailand.

World oriental tobacco production is forecast at 955,000 tons up 3 percent from last year. In the Soviet Union, the world's largest producer, output is projected to be slightly above last year. Soviet farmers did not have to replant tobacco plants because of timely spring weather. This year's Soviet crop is expected to reach a near-record level due to increased inputs. Production in Turkey, the world's second largest producer, is forecast to increase 2 percent as the government continues to emphasize quality tobacco. Farmers are also being encouraged not to plant tobacco on low-yielding lands.

The 1986 world dark air/sun-cured tobacco crop is forecast at 1.08 million tons, 2 percent less than last year. In India, the world's largest producer, output is forecast up 4 percent from last year due to a corresponding area increase. In Indonesia, production is expected to be 5 percent greater than last year due to a slight increase in area. Output in China is expected to be in line with last year's level. However, estimates of production increases in these three countries are more than offset by estimates of sharp production decreases in Brazil, Pakistan, and Poland.

World unmanufactured tobacco production for 1985 and 1986 by leaf type, is forecast as follows:

Leaf type	Revised 1985	Forecast 1986
	1000 Metric Tons	
Flue-cured	3,709.1	3,462
Burley	695.5	669
Oriental	925.0	955
Dark air/Sun-cured	1,097.7	1,080
Light air-cured	141.1	125
Dark air-cured, cigar	205.7	199
Dark fire-cured	76.0	66
TOTAL	6,850.1	6,556

Country/Regional Production

North America

Total unmanufactured tobacco production in North America is forecast down 10 percent in 1986. Smaller crop prospects in the United States and Canada are expected to offset a sharp increase forecast for Mexico. Flue-cured production is also forecast down 15 percent in 1986 due to a decline in planted area in both the United States and Canada. The 1985 burley crop is forecast at 274, 265 tons, down 4 percent from last year due in part to an 8 percent decline forecast for the United States

In the United States, 1986 total unmanufactured tobacco production is projected at 602,967 tons, down 12 percent from last year. Yields are expected to be below last year's 2.46 tons per hectare. Production declines are also projected for flue-cured, burley, dark air/sun-cured, light air-cured, dark air-cured, cigar and dark fire-cured tobaccos.

Canada's 1986 tobacco crop is forecast at 63,356 tons, 28 percent below last year. Over the last several years, tobacco production in Canada has fallen sharply from normal levels due to weak domestic and export demand. In 1986, the largest decline is projected for flue-cured tobacco. The Canadian Tobacco Manufacturers Council (CTMC) set this year's Ontario flue-cured production target at 52,163 metric tons, 33 percent below the 1985 target of 77,111 tons. Ontario produces approximately 90 percent of the total Canadian flue-cured tobacco crop. Canada is also expected to produce smaller dark air/sun-cured and dark air-cured, cigar crops. For the second consecutive year, Canada will not produce any burley tobacco, all of which is grown in Ontario, because burley growers failed to reach a contractual agreement with buyers.

In Mexico the 1986 tobacco crop is projected at 75,810 tons, 41 percent above the 1985 crop. The expected sharp increase in production is anticipated as a result of a 40 percent area increase, favorable weather and better control of the Blue Mold Fungus.

Caribbean

Total tobacco production in the Caribbean is forecast at 76,770 tons, 2 percent above last year. Cuba's 1986 crop is projected at 46,000 tons. Recent rains in the eastern part of the country did not cover the major producing regions grown in the central and western portions of the island. In the Dominican Republic, production is forecast up 4 percent from last year. Tobacco yields have been increasing since 1982 due to an increasing use of chemical fertilizers and pesticides. The shift from black to blond tobacco continues due to higher prices and higher returns to farmers.

South America

Tobacco production in South America is forecast at 477,929 tons, 9 percent below last year. Lower output in Brazil, Paraguay and Chile more than offset higher production in Argentina, Columbia and Venezuela.

Brazil's tobacco crop is forecast at 345,000 tons, 13 percent below the 1985 crop. The 1986 crop in the South was planted during June and July of 1985 and transplanted in August and September under normal weather conditions. However, in late September and early October, drought hit this region and lasted until the middle of February 1986. The 1986 crop in the Northeast is down due to a combination of prolonged rains followed by extremely dry weather. Quality in both regions has been adversely affected due to unfavorable weather conditions.

The 1986 tobacco crop in Paraguay was also affected by drought. This year's crop is forecast at 3,548 tons, 52 percent below the 1985 crop of 7,320 tons. During the last several years, tobacco production has dropped sharply as farmers plant cotton in response to better prices.

Argentina's tobacco crop is projected at 66,040 tons, 9 percent above last year. A 25-percent increase is expected for flue-cured tobacco due to a 15 percent area increase. Fertilizer use is up this year due to the expectation that prices will improve.

Colombia's tobacco crop is forecast at 32,464 tons, 1 percent above last season. Thus far, weather conditions have been favorable. Rains fell during the usually dry season of January through March. Because of relatively higher prices, farmers continue to shift to lighter from dark tobaccos.

European Community

Tobacco production in the European Community (EC-12) is projected at 394,006 tons, 10 percent above last year's EC-10 figure. The entry of Spain and Portugal into the European Economic Community in 1986 is the primary cause for the increased output. Larger crops are also forecast for Portugal, France, and Belgium/Luxembourg. Smaller crop prospects are anticipated in Italy, Spain, and the Federal Republic of Germany.

France's 1986 crop is forecast at 36,301 tons, 2 percent above the previous season's level. Area is up slightly as farmers continue to shift from dark to lighter tobaccos. The shift from dark to lighter tobaccos reflects growing consumer preference for American-type cigarettes and higher prices.

The forecast in Italy is for a crop of 163,000 tons, 7 percent below last year. Preliminary planting intentions indicate a significant reduction in planted area for flue-cured and burley tobaccos. Factors contributing to lower output include unfavorable support prices, late seedling development due to excessive rain and deferred transplanting.

Eastern Europe

Production in Eastern Europe is forecast at 405,271 tons, 3 percent above last year. Larger crop prospects are anticipated for Bulgaria and Yugoslavia.

Bulgaria's tobacco crop is projected at 147,682 tons, 16 percent above the previous year's drought-affected crop. Thus far, growing conditions have been favorable and water reserves for irrigation are reported to be normal.

The 1986 tobacco crop in Yugoslavia is expected to total 84,750 tons, 6 percent above the 1985 crop. Area is expected to increase 3 percent due to favorable support prices. Oriental tobacco production, which represents approximately 62 percent of the total crop, is expected to increase 8 percent.

In Poland, the 1986 crop is forecast at 92,800 tons, 17 percent below the previous year. Production of dark air/sun-cured tobacco, which represents approximately 44 percent of total output, continues to fall due to favorable flue-cured prices. This season's smaller crop should help to reduce large stocks.

USSR

The 1986 crop in the Soviet Union is forecast at a near-record 381,000 tons. Because of timely spring weather, farmers were able to avoid late planting. Post-harvest losses are expected to be reduced due to improvements to storage and processing facilities.

Africa, excluding North Africa

Tobacco production in Africa, excluding North Africa, is forecast at 294,767 tons, 3 percent above last year. Production increases are anticipated in Zimbabwe and Zambia. Production declines are projected in South Africa and Tanzania.

The 1986 tobacco crop in Zimbabwe is forecast at 117,022 tons, 8 percent above last year. Overall weather conditions have been favorable despite delayed arrival of the rains and continuous, wet overcast weather during the early portion of the growing season. Support prices remain favorable.

South Africa's crop is forecast at 39,080 tons, 2 percent below the previous season. Tobacco is mainly grown under irrigation. Due to drought during the past several years, a shortage of irrigation water exists in some areas.

Asia

Tobacco production in Asia is forecast at 3,473,364 tons, 5 percent below the 1985 level. Smaller crop prospects in China, Pakistan, the Philippines, Taiwan, and Thailand more than offset larger crop prospects in India, Indonesia, Japan, the Republic of Korea, and Bangladesh.

China's 1986 tobacco crop is forecast at 2,146,200 tons, 7 percent below last year. The decline in production is attributed to a 6 percent area decline. Although some progress was made in 1985 to upgrade leaf quality, the production of poor quality leaf continues to be the major problem confronting the tobacco industry. The government of China has introduced a more specific but simplified grading system which encourages the production of high quality leaf.

The 1986 tobacco crop in Pakistan is projected at 55,865 tons, 36 percent below the 1985 crop. A smaller crop outturn is anticipated as a result of a 32 percent decline in planted area. Due to large stock levels the tobacco company requirements for the 1986 season were sharply reduced. Moreover, many large tobacco farmers are shifting out of tobacco production because of high labor costs. However, small sugarcane farmers have shifted from sugarcane to tobacco production due to low sugarcane prices.

The tobacco crop in the Philippines is forecast at 73,315 tons, 3 percent below the previous year. The lower crop estimate is anticipated primarily as a result of a 7 percent area decline. Farmers continue to shift from tobacco to more profitable crops such as cotton, garlic, and vegetables. More recently, farmers have shifted from tobacco to corn production. The sharp decline in tobacco area in recent years has also been the result of inadequate financial and technical assistance.

India's tobacco crop is projected at 480,000 tons, 2 percent above the 1985 crop. The 1986 dark air/sun-cured crop which represents approximately 78 percent of total output is forecast at 372,800 tons, 4 percent above the previous year. Increased output is due to a corresponding increase in planted area. Production of flue-cured tobacco, however, is forecast at 102,600 tons, 6 percent below the 1985 crop. The Government of India's Tobacco Board regulates production of this type of tobacco in order to keep supply and demand in balance and to ensure remunerative prices to farmers.

The 1986 tobacco crop in Japan is forecast at 124,900 tons, 7 percent above the previous year. A higher crop outturn is expected assuming more normal weather. Last season, most producing area, except the northern part of the island where burley is grown, were hit by typhoons and plagued by periods of excessive rainfall. Because of growing consumer preference for milder cigarettes, the Japan Tobacco Incorporation, a government-owned corporation, has initiated an incentive payment program to encourage Japanese farmers to produce more burley tobacco.

In the Republic of Korea, the 1986 tobacco crop is forecast at 80,000 tons, 6 percent above the 1985 level. Favorable weather in January and February allowed the timely establishment of tobacco seedbeds. The transplanting of seedlings to field began on time in March and is nearly complete despite dry soil conditions in some producing areas.

Middle East

Tobacco production in the Middle East is forecast at 251,296 tons, 4 percent above the previous year. Larger crop prospects are anticipated for Iraq, Syria, and Turkey.

In Turkey, the 1986 tobacco crop is forecast at 80,000 tons, 2 percent above the 1985 crop. The government is encouraging tobacco farmers to plant tobacco in designated high-yielding areas. Also, in an attempt to improve the overall quality of production, farmers producing superior quality leaves will receive higher prices.

Syria's 1986 tobacco crop is projected at 16,800 tons, 21 percent above a year ago. The production of flue-cured tobacco is forecast to increase 34 percent. The General Organization for Tobacco is encouraging increased production of flue-cured leaf in order to supply the increasing demand for American-blend cigarettes.

Special Report:
European Community Trade in Cigarettes and Cigars, 1984 and 1985

Cigarettes

European Community (EC) exports of cigarettes in 1985 to all countries, including EC partners, totaled 158.8 billion pieces, valued at 2.087 billion European Currency Units (ECUs), approximately $1.65 billion, up 7 percent in quantity and 15 percent in ECU terms from the 1984 figures of 148.4 billion pieces and 1.821 billion ECUs (approximately $1.42 billion). The Federal Republic of Germany was the leading exporter in 1985, with 47.8 billion pieces, up 8 percent in volume from the previous year. Next was the Netherlands, with 46.0 billion pieces, up 9 percent in volume from 1984. The third largest exporter was the United Kingdom, with 39.4 billion pieces exported in 1985, down less than 1/2 percent from 1984. For exports, the average number of cigarettes per reported weight in kilograms was 966 in 1985. This is 1.4 percent more cigarettes per kilogram of reported weight in 1984, when the figure was 953 pieces per kilogram. In 1985, the average value of cigarettes exported from the EC was 13.15 ECUs per 1,000 (about $10.50), up 7 percent from the 1984 figure of 12.27 ECUs per 1,000 (about $ 9.50).

Imports into the EC from all countries, including EC partners, totaled 116.6 billion pieces, valued at 1.503 billion ECUs (approximately $1.19 billion), up 19 percent in volume and 30 percent in ECU terms from 1984's 97.6 billion pieces valued at 1.159 billion ECUs (approximately $907 million). France was the biggest importer in 1985, with 44.4 billion pieces entering, up 12 percent from the 1984 volume of 39.6 billion pieces. Next was Italy, with 34.6 billion pieces, up 34 percent from 1984's 25.8 billion pieces. The Netherlands was the third largest importer in 1985, with 14.9 billion pieces, up just 1.5 percent from the 1984 figure of 14.6 billion. For imports, the average number of cigarettes per kilogram of reported weight in 1985 was 919. This is down sharply, some 6 percent from the 1984 figure of 978 pieces.

Principal Exporters

The Federal Republic of Germany was the largest exporter in 1985, shipping some 47.8 billion pieces. This is up 8 percent from the 1984 volume of 44.3 billion pieces. Leading customers of West German cigarettes in 1985 were Italy at 18.1 billion pieces, up 5 percent from 1984; followed by the United Kingdom with 8.6 billion pieces, up 72 percent from the previous year; and France at 7.5 billion pieces, down 7 percent from 1984. Exports outside the EC totaled 6.5 billion pieces in 1985, down 5 percent from the 1984 figure of 6.9 billion. Extra-EC leading exports in 1985 were to Iran (2.8 billion pieces), Cyprus (928 million pieces), and the United States (295 million pieces).

The Netherlands shipped 46.0 billion pieces in 1985. This is up 9 percent from the 1984 figure of 42.2 billion pieces. The leading customer was France, where 27.2 billion pieces were shipped, up 10 percent from 1984. Next largest was Italy, with 12.3 billion pieces, up 7 percent from the previous year. The third largest customer of Dutch cigarettes was Belgium/Luxembourg, with 2.3 billion pieces, up 7 percent from 1984. Extra-EC exports were 1.2 billion in 1985, 13 percent below the 1984 figure of 1.3 billion. Leading customers outside the EC in 1985 were Switzerland (134 million pieces), Saudi Arabia (129 million pieces), and Poland (82 million).

The United Kingdom exported 39.4 billion cigarettes in 1985, off 0.4 percent from the 1984 figure of 39.6 billion pieces. Belgium/Luxembourg was the largest customer, with 6.0 billion, up 27 percent from 1984. Next was the Netherlands, with 6.0 billion, up 1 percent from 1984. The third largest customer was Saudi Arabia, with 5.8 billion pieces, down 24 percent from 1984. Exports outside the EC totaled 25.0 billion pieces in 1985, down 6 percent from 1984. Other leading extra-EC customers besides Saudi Arabia were Hong Kong, with 2.9 billion pieces, up 95 percent from 1984; and the United Arab Emirates, with 1.8 billion pieces, down 13 percent from 1984.

Principal Importers

France was the leading EC importer in 1985, with a volume of 44.4 billion pieces, up 12 percent from 1984. The Netherlands was the largest source, with 31.1 billion pieces, up 22 percent from 1984. Next was the Federal Republic of Germany, with 7.9 billion pieces, up 5.5 percent from 1984. The third largest source was Belgium/Luxembourg, sending 3.8 billion pieces, down 28 percent from the previous year.

Italy imported 34.6 billion pieces in 1985, up 34 percent in 1984. The Federal Republic of Germany was the largest source, with 20.6 billion pieces, up 43 percent from 1984. Next was the Netherlands, at 12.3 billion pieces, six times the 1984 amount of 2.0 billion pieces. The third largest source was Switzerland, with 1.1 billion pieces, down 88 percent from the previous year figure of 8.9 billion.

The Netherlands imported 14.9 billion pieces in 1985, up 1.6 percent from 1984. Belgium/Luxembourg was the largest source, at 8.9 billion pieces, nearly unchanged from 1984. Next was the Federal Republic of Germany, with 4.8 billion pieces, down 10 percent from the previous year. Third largest was the United Kingdom, at 1.0 billion pieces, six times the 1984 figure of 164 million.

The United Kingdom imported 12.3 billion cigarettes in 1985, up 59 percent from the 1984 amount of 7.8 billion pieces. The Federal Republic of Germany was the largest source, with 8.6 billion pieces, up 69 percent from 1984. Next highest source was the Netherlands, with 1.9 billion pieces, up 10 percent from the previous year. The third highest was Belgium/Luxembourg with 0.8 billion pieces, 252 percent above 1984.

Cigars

European Community exports of cigars in 1985 to all countries, including EC partners, totaled 4.38 billion pieces, valued at 239 million ECUs (approximately $190 million), up 5 percent in quantity, and 5 percent in ECU terms from the 1984 level of 4.2 billion pieces and 228 millions ECUs (approximately $178 million). The 1985 average export value was 54.52 ECUs (approximately $43.25) per 1,000 pieces, up slightly from the 1984 value of 54.28 ECUs (approximately $42.50) per 1,000 pieces.

The Netherlands and Belgium-Luxembourg were the leading cigar exporters in 1985 with 2.02 billion pieces and 1.85 billion pieces. Compared with 1984, shipments from the Netherlands fell 1 percent in volume while shipments from Belgium-Luxembourg rose 10 percent from 1984. Other leading exporters within the EC are the Federal Republic of Germany and Denmark. Shipments from these

BEST COPY AVAILABLE

countries in 1985 totaled 224 million pieces and 138 million pieces, respectively. For the Federal Republic of Germany, the 1985 export volume fell 3 percent from 1984, while shipments from Denmark in 1985 were up 16 percent from the previous year.

Cigar imports into the EC during 1985 from all countries, including EC partners, totaled 4.14 billion pieces, valued at 246 million ECUs (approximately $195 million). The 1985 import volume was down by 3 percent from the 1984 level of 4.27 billion pieces but was up by 5 percent in value from the 1984 figure of 233 million ECUs (approximately $182 million). In 1985, the average cigar import value was 59.57 ECUs (approximately $47.25) per 1,000 pieces. The Netherlands was the largest importer during 1985 with imports of 1.499 billion pieces, up 5 percent from the 1984 level of 1.422 billion pieces. France and Belgium-Luxembourg were also major importers during 1985 with imports of 962 million pieces and 852 million pieces, respectively. Imports to France during 1985 rose 3 percent from the 1984 level of 932 million pieces. Imports to Belgium-Luxembourg during 1985 fell 16 percent from the 1984 level of 1.02 billion pieces.

FOREIGN AGRICULTURAL SERVICE, USDA

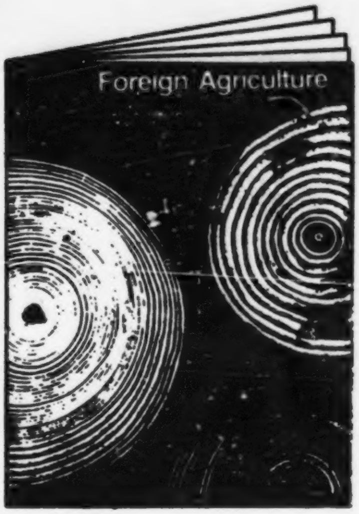
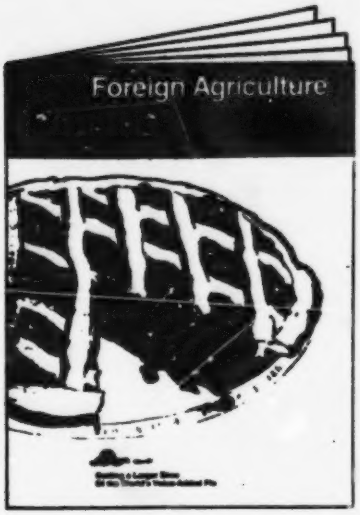
*U.S. GOVERNMENT PRINTING OFFICE: 1986-490-917-20515/FAS





Do you need information about

- Overseas markets and buying trends?
- New competitors and products?
- Trade policy developments?
- Overseas promotional activities?

Then **Foreign Agriculture** — USDA's fact-filled monthly agricultural trade magazine — is for you. Based on official USDA data available nowhere else, **Foreign Agriculture** articles are clear and crisp, written to provide the export information you need, in a concise and extremely readable form.

Special information is found in **Foreign Agriculture's** telegraphed, targeted news departments: Fact File, Country Briefs, Trade Updates and Marketing News. And its tables and graphs will give you an immediate grasp of what's going on overseas.

In addition, periodic special issues—such as the one devoted entirely to value-added exports—will give you a wide range of detailed information about overseas markets.

If you use agricultural facts and figures in your business, you need **Foreign Agriculture.**

Subscribe today! Just $16.00 ($20.00 for foreign delivery) brings you Foreign Agriculture for 12 full months.

FAS Circulars: Market Information For Agricultural Exporters

As an agricultural exporter, you need timely, reliable information on changing consumer preferences, needs of foreign buyers, and the supply and demand situation in countries around the world.

The Foreign Agricultural Service can provide that information in its commodity circulars.

World agricultural information and updates on special FAS export services for the food and agricultural trade all are available in these periodic circulars.

For a sample copy of these reports—which can supply you with the information you need to make sound business decisions—check the box indicated, fill out the address form and mail it today

To subscribe: Indicate which publications you want. Send a check for the total amount payable to the Foreign Agricultural Service. Only checks on U.S. banks, cashier's checks, or international money orders will be accepted. NO REFUNDS CAN BE MADE.
